### United States

## Foreign Trade

U. S. DEPARTMENT OF COMMERCE
Luther H. Hodges, Secretary

BUREAU OF THE CENSUS Richard M. Scommon, Director

SUMMARY REPORT FT 930-E August 1963

FOR RELEASE October 10, 1963

#### EXPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the increase in United States exports of domestic merchandise, from \$1,795.1 million in July to \$1,884.6 million in August¹, a gain of about five percent, resulted from increases in exports of finished manufactures, crude materials, semimanufactures and manufactured foodstuffs which were partly offset by a decrease in exports of crude foodstuffs. The August 1963 domestic merchandise export total was about 14 percent higher than the August 1962 total of \$1,660.9 million. These totals include data on Department of Defense Military Assistance Program - Grant-Aid shipments.

With Military Assistance Program--Grant-Aid shipments excluded, the August domestic merchandise export total amounted to \$1,816.0 million, a level about six percent above the July total of \$1,711.6 million and about 11 percent above the August 1962 total of \$1,633.3 million.

The increase in exports of finished manufactures from \$1,046.8 million in July to \$1,084.1 million in August reflected, in part, increases in exports of aircraft, parts and accessories,

1See the August 1963 issue of Report No. FT 900-E for seasonally-asjusted figures on total exports, excluding Military Assistance Program-Grant-Aid shipments. Seasonally-adjusted data are not available on a commodity basis.

from \$89.7 to \$101.8 million; automobile parts for assembly and replacement, from \$46.7 to \$56.0 million; office, accounting and computing machines and parts, from \$27.3 to \$33.6 million; and power generating machinery, from \$22.8 to \$26.9 million. Exports of passenger cars, also included in this economic class, fell from \$10.9 to \$5.1 million. Exports of crude materials rose from \$182.6 to \$217.7 million mainly due to a rise in exports of coal, from \$36.2 to \$53.0 million; unmanufactured cotton, from \$25.9 to \$36.7 million; and unmanufactured tobacco, from \$24.4 to \$32.3 million. The increase in exports of semimanufactures, from \$271.9 to \$300.2 million, was largely accounted for by increases in exports of industrial chemicals, excluding Special Category type 1, from \$31.1 to \$40.3 million; copper semimanufactures, from \$15.0 to \$20.9 million; and iron and steel plates, sheets and strips, from \$12.8 to \$15.8 million. The rise in exports of manufactured foodstuffs, from \$112.8 to \$123.7 million, was primarily due to an increase in exports of refined vegetable oils, fats and waxes, from \$6.3 to \$13.0 million, and small scattered increases in exports of most of the other individual commodities included in this economic class. Exports of milled rice, however, fell from \$16.2 to \$5.7 million.

Exports of crude foodstuffs fell from \$181.0 million in July to \$158.8 million in August owing chiefly to decreases in exports of corn from \$3.6.7 million; fresh or dried vegetables from \$3.0 million; and wheat, from \$91.2 to \$87.1 million

OCT 1963

EXPLANATION OF STATISTIC

COVERAGE: Expurt statistics include government as well as nongovernment shipments to foreign countries. The export statistics, therefore, include Department of Defense Military Assistance Program—Grant-Aid shipments (for which separate figures are shown in the footnotes of this repurt), Mutual Security Program economic assistance shipmenta, and shipmenta of agricultural commodities under P.L. 480 (The Trade Development and Assistance Act of 1954, as amended) and related laws. (The separate information which is available on exports under P.L. 480 and related laws may be obtained from the Economic Research Service and the Foreign Agricultural Service of the Department of Agriculture. Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Peerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as a part of the United States between foreign countries, not entered as imports, is not included in export states between foreign countries, not entered as imports, is not included in export states between foreign countries, not entered as imports, is not included in export statistics.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportstion and other casts beyond the United States part of exportation are excluded. None of the values have been adjusted for changes in price level.

RELIABILITY: The tatistics of sented in this report are hased partly on sample data and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all export documents. For the figures shown in this report the sampling variability can be ignored since the prohable variability due to sampling is either less than \$50,000 (the largest variation from rounding of figures) or less than a trivial percentage of the individual totals shown. In addition to the effects of sampling variation, the data in this report are subject to errors from such sources as the carry-over of data from month to month, errors in reporting or processing, the estimation of shipments valued under \$100 (estimated data for such shipments are included in the over-all export total and in the totals for "Finished manufactures" and "All other finished manufactures, exclusive of Special Category Type 1" but excluded from ther totals), and the omission of parcel past shipments valued under \$50. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of export data is contained in the foreword of Report No. FT 410. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

# UNITED STATES EXPORTS OF DOMESTIC MERCHANDISE, BY ECONOMIC CLASSES AND LEADING COMMODITIES: AUGUST 1963 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. Figures for 1963 are as originally issued and have not been revised to include published corrections. Figures for 1962 include revisions published with the December 1962 reports, or earlier, but do not include revisions published during 1963. Totals represent sum of unraunded figures, hence may vary slightly from sum of rounded amounts. N.e.c. indicates not elsewhere classified)
